

## Warranty Policy - Wyoming Tactical Firearms LLC (W.T.F. Silencers)

At **Wyoming Tactical Firearms LLC (W.T.F. Silencers)**, we know stuff happens, and we've got your back. Our general warranty policy offers a **lifetime warranty**: if your suppressor gets damaged, we'll fix it. Whether it's free or not depends on how it got messed up.

As of **01/01/2026 Dead Air KeyMo mounts** are no longer covered under our free warranty for any suppressor due to a high rate of failures and associated damage, prioritizing customer safety. For questions, contact our warranty department at **office@wtfsilencers.com**

### Free Warranty Examples

The following issues are covered under our free warranty:

- <sup>35</sup><sub>17</sub> End cap strikes
- <sup>35</sup><sub>17</sub> Baffle strikes
- <sup>35</sup><sub>17</sub> Mount stuck inside the suppressor (a mount we manufactured or provided.
- <sup>35</sup><sub>17</sub> Any issues arising from general use

### Non-Free Warranty Examples

The following issues are **not covered** under free warranty and will incur costs for parts and labor:

- <sup>35</sup><sub>17</sub> Use of Dead Air KeyMo mounts
- <sup>35</sup><sub>17</sub> Attempting to bore out the suppressor to increase the bore size (e.g., using a drill bit or boring bar)
- <sup>35</sup><sub>17</sub> Drilling holes to reduce back pressure
- <sup>35</sup><sub>17</sub> Welding a mount to make it permanent
- <sup>35</sup><sub>17</sub> Cutting the suppressor in half and attempting to weld a new end cap
- <sup>35</sup><sub>17</sub> Any permanent modifications to the suppressor

**Note:** We've received inquiries about these modifications. Please avoid them, as they will void the free warranty. We'll still repair the suppressor if needed, but you'll be charged for parts and labor.

## Universal Mounting Threads

Using **1.375×24/HUB/universal mounting threads** (except KeyMo) is not considered a permanent modification, as the suppressor is designed for this use. Issues like end cap strikes using mounts or muzzle devices from other companies are still covered under the free warranty.

## Paint

Paint wear is **not covered** under warranty once the suppressor is used. Dings, chips, scratches, or paint stripped by cleaning solutions are not covered. If a suppressor has paint imperfections out of the box and hasn't been used, we'll fix it at no cost. Once it's mounted and used, paint issues are not covered, as suppressors are tools, and paint is not essential to function.

## Stuck Mount Removal

We'll remove stuck mounts free of charge. However, mounts may get damaged during removal, depending on how stuck they are. We are not liable for damaged mounts and will not replace them, though we'll do our best to avoid damage.

## Stolen Suppressors

If your suppressor is stolen (e.g., from your home or car), we'll replace it for free, provided you submit:

- <sup>35</sup><sub>17</sub> Police reports and/or contact information for the department
- <sup>35</sup><sub>17</sub> Proof of reporting the theft to the ATF

Note: A replacement will require a new serial number, a \$200 ATF tax stamp (if applicable), and the associated wait time.

## Warranty Work Lead Time

Warranty work is our **top priority**. When a suppressor arrives for warranty service, we focus on it immediately, even halting other production if needed. Most warranty repairs are completed and shipped back within **2 weeks**, including transit time.

## Contacting Us for Warranty Work

We don't have a formal RMA process. Simply email one of the following addresses, and we'll guide you on what to include in the package:

<sup>35</sup><sub>17</sub> **office@wtf silenci ers.com**
