Barron 50 Caliber Non-BMG Silencer

SPECIFICATIONS

LENGTH:	9.9"
DIAMETER:	1.825"
WEIGHT:	23 OZ (SS) 16 OZ (TI)
THREAD:	1/2-28, 5/8-24, 1/2-36,
ADAPTER	3/4-24, 3/4-28, .578-28,
SIZE	49/64-20

MSRP \$1,320.00 (SS) \$1,749.00 (TI)

Only 112.29 Shooters Ear DB impulse when shooting 500 S&W subsonic with a 16" Big Horn Armory Model 89

100% Made & sourced in the USA!

The Barron is specifically designed and engineered for large bore calibers - .50 caliber ammunition in NON BMG such as 500 S&W Mag, 500 Auto Max, 50 Beowulf® (Alexander Arms™), 458 SOCOM, 45-70, 450 Bushmaster. The Barron will dramatically reduce the felt recoil as well as greatly reduce the sound heard (decibel reduction). Fully welded construction using 17-4 SS and also available in Titanium with the receiving threads in 1.375x24 for HUB adapters and inserts. The Barron is only 9.9" long, 1.825" Diameter and only 23 ounces (SS) and 16 ounces (TI), a conveniently small package for the task of taming the 50 caliber rounds. The Barron is finished with Cerakote in V-Series (multiple colors available). The Barron is a great all-around silencer that works amazing with smaller calibers as well.

The Barron is capable of handling:

- Ammunition with a muzzle velocity of 3650 feet per second or less.
- Cartridge combustion pressure less than 65,000 PSI.
- Ammunition with less than 100 grains of firing powder.
- Firearms that have a barrel longer than 1 inch in length.
- The Barron is rated for FULL AUTO firing as long as the ammunition does not exceed recommended maximums and the Barron is kept under 800 degrees.

Tatanka Long 36 & 416 Caliber Silencer

SPECIFICATIONS

LENGTH: 7.25"
DIAMETER: 1.6"
WEIGHT: 15 OZ (SS), 9 OZ (TI)
THREAD: 1/2-28, 5/8-24 & 1/2-36
ADAPTER SIZE

MSRP \$1199.00 (SS) \$1449.00 (TI)

Only 103.57 Shooters Ear DB Impulse with 9MM Subsonic Loads

100% Made & sourced in the USA!

The Tatanka Long is a very compact effective suppressor. 7.25" and 1.6" diameter and only 15 ounces in Stainless Steel and 9 ounces in Titanium. It is a great option for big bore calibers. Featuring a fully welded design that ensures strength and accuracy. Full Auto Rated- for non-magnum calibers (keep under 800 degrees Fahrenheit). Available in two sizes, .36 Caliber & .416. Made from very tough 17-4 SS and also available in Titanium. Designed for the 350-400 Legend, 9mm carbines, 8.6 Blackout, .375 RUM and all others up to .416 Cal. Comes with the universal thread size (HUB) 1.375"-24 TPI and includes one direct thread adapter- 1/2-28, 5/8-24 & 1/2-36. The Tatanka is coated in V-Series Cerakote.

The Tatanka is capable of handling:

- A muzzle velocity of 4000 feet per second.
- Combustion pressure up to 65,000 PSI.
- Ammunition with up to 100 grains of firing powder.
- .360 and .416 calibers (projectile diameter \leq .416 inches or .360 for the .36 model).
- Up to 30 dB noise reduction (depending on ammunition and barrel length).
- Full auto rated if limited to bursts of 30 rounds with a 5 minute colling period.

127.28 Shooters Ear DB impulse with the .280 Cal on a 16" AR15 55gr.
124.61 Shooters Ear DB Impulse with the .30 Cal on a 16" AR15 300 Blackout Subsonic

100% Made & sourced in the USA!

The Jackalope suppressor is available in .280 (7mm) and .30 caliber options, crafted from Stainless Steel and also available in Titanium for a mere 7.6 inches in length and under 10 ounces. This magnum-rated suppressor is the ultimate choice for hunting rifles and semi-auto platforms. The .280 caliber model is specifically designed for 7mm cartridge shooters, offering a tailored alternative to standard .30 caliber suppressors. Featuring a fully welded design that ensures strength and accuracy. Compatible with cartridges such as .22 Creedmoor, 6mm Creedmoor, 6.5 Creedmoor, 6.5 PRC, 7 PRC, 300 PRC, 300 WinMag, .243 Win, .223 Rem, 5.56 NATO, and .308 Win. Note: The .280 caliber model is not compatible with cartridges larger than 7mm or .284 diameter.

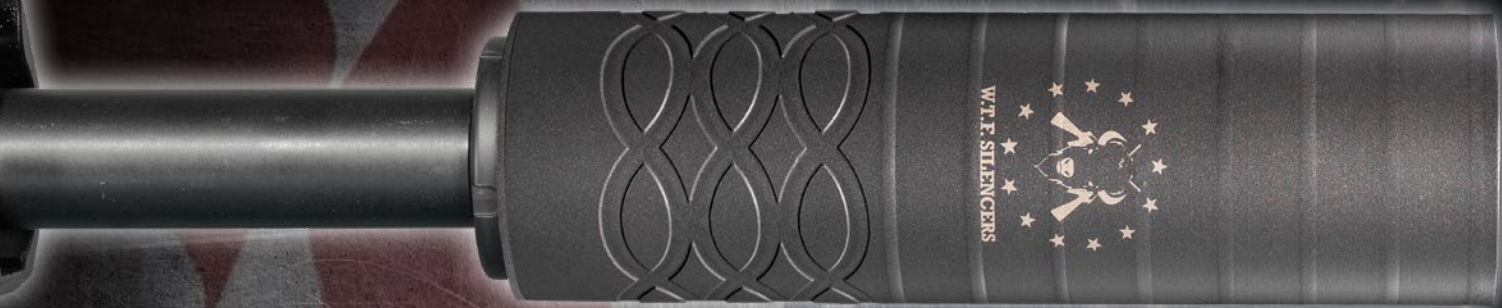

The Jackalope is capable of handling:

- A muzzle velocity of 3650 feet per second.
- Cartridges that produce up to 65,000 PSI.
- Ammunition with less than 100 grains of firing powder.
- 8 inches minimum barrel length for any caliber that is designed for a rifle.
- 14-inch barrel restrictions with the following calibers and calibers that are close to the same ballistics and loading characteristics as them: 6.5CM, 6.5PRC, 6CM, 270WinMag, 26Nosler, 7RUM, 7WSM, 28Nosler, any Weatherby calibers, and any magnum rated calibers not listed.

Pronghorn .223/5.56 Silencer

SPECIFICATIONS

LENGTH: 5.3"
DIAMETER: 1.48"
WEIGHT: 10 OZ (SS), 6.5 OZ (TI)
THREAD: 1/2-28 or 5/8-24
ADAPTER SIZE

MSRP \$859.00 (SS) \$1079.00 (TI)

100% Made & sourced in the USA!

The Pronghorn suppressor is crafted from durable 17-4 Stainless Steel and also available in Titanium. It is rated for limited full-auto use in Stainless Steel only. Designed specifically for .223/5.56 gas-operated systems, such as the AR-15 platform, it excels in high-performance applications. Featuring a fully welded design that ensures strength and accuracy. Expect the decibel reduction to be comparable to traditional full-size suppressors, the Pronghorn achieves this in a compact package, measuring just 5.3 inches in length with a 1.485-inch diameter and weighing only 10 ounces in SS and under 6.5 ounces in Ti. Ideal for shooters seeking a short, lightweight suppressor, it includes a 1/2-28tpi or 5/8-24tpi HUB-compatible thread adapter. The minimum barrel length is 10 inches, and operators must ensure the suppressor does not exceed 800°F. Finished in V-Series Cerakote for enhanced durability and aesthetics.

The Pronghorn is capable of handling:

- Ammunition with a muzzle velocity of 3650 feet per second or less.
- Cartridge combustion pressure less than 65,000 PSI.

Marmot 9MM/22LR Modular Silencer

SPECIFICATIONS

LENGTH: 6.125"
DIAMETER: 1.325"
WEIGHT: 3.75 OZ
THREAD: 1/2-28
SIZE

MSRP \$379.00

100% Made & sourced
in the USA!

Designed specifically for fixed and floating barrel 9mm and .22LR pistols — no booster required on most models. Fully modular threaded baffle design lets you customize the length to perfectly match your firearm and application. The Marmot also performs great on 9mm and .22LR carbines and rifles. Includes 7 baffles + both 9mm and .22LR end caps. Fully serviceable, disassembles easily for cleaning and maintenance. Crafted from 7075 aircraft-grade aluminum with durable H-Series Cerakote finish (available in Black or Burnt Bronze). Delivers sound reduction comparable to full-size suppressors in a much smaller, lighter package. Rated for use up to 500°F.
